

AIT Series

Trends in earth observation

Instructions to authors

The Series **Trends in earth observation** publishes scientific papers relating to remote sensing disciplines and applications. Manuscripts must be submitted in the form of original articles. The Series aims to provide its readers with papers of the highest quality and impact through a process of careful peer review and editorial work.

Duties and responsibilities of all the subjects involved in the editorial process are summarized at **Publishing ethics**.

Submission of manuscripts

Papers should be submitted directly to the Editorial Office at (trendsinEO@aitonline.org). The Series does not apply any charges for submission. Authors are requested to choose a corresponding author. The corresponding author is responsible for the following requirements: managing all communications between the journal and all co-authors during the manuscript submission, peer review, publication process and after publication; ensuring that the names of authors, their arrangement and affiliations are correct; ensuring that all listed authors have approved the manuscript before submission; making sure all permissions to reproduce previously published material have been obtained from the copyright owner; making sure disclosures, declarations, statements from all authors are included in the manuscript as appropriate.

Ethical Responsibility of Authors

Submission of the manuscript means that the paper is original and has not yet been totally or partially published, is not currently under evaluation elsewhere for simultaneous consideration, is free of plagiarism and does not infringe any copyright or right of privacy. If accepted, the manuscript will not be published elsewhere either wholly or in part in any form or language except in case of specific agreements. All authors are responsible for their research. The manuscript must be approved by all co-authors, if any, as well as, tacitly or explicitly, by the responsible authorities of the institution where the work was carried out. Results should be presented clearly, honestly and without fabrication or inappropriate data manipulation.

Permissions to reproduce previously published material

Material (such as figures) taken from other publications must be accompanied in the cover letter by permission of the copyright owner with complete reference information (for example, a footnote at the bottom of the figure must credit the original source). Any material received without such permission will be assumed to have been originally created by the authors.

Conflicts of interest

A conflict of interest occurs when any financial interest may affect the content of an article. To promote transparency and avoid any possible bias of the readers towards the article, each author must disclose any potential conflict of interest at the same time as sending the manuscript. All sources of funding should be acknowledged at the end of the manuscript file.

Authorship and contributorship

Full approval of the manuscript by all authors should be explicitly stated by including the following statement "All authors read and approved the final version of the manuscript" in the e-mail together with the manuscript

Fundamental errors

Any significant error must be brought to the journal attention by the authors. Depending on the nature of the error, the journal will decide whether to publish a correction or a retraction.

Potential misconduct

Examples of inappropriate acts include but are not limited to fabrication, falsification, plagiarism, repetitive publication, obfuscation of significant research results, failing to comply with authorship requirements, failing to report significant conflicts of interest.

In case of a suspicion of misbehavior or alleged fraud, the journal will follow the COPE guidelines. If deemed necessary, the publisher will take one of the following actions including but not limited to: rejection if the manuscript is still under evaluation, publication of an erratum, a retraction if the article has already been published online.

Disclaimer

The Publisher, Editors, and Editorial Board cannot be held responsible for the opinions and contents of publications contained in this Series.

Peer review and production

The authors implicitly agree to their paper being peer-reviewed. All manuscripts will be reviewed by Editorial Board members who reserve the right to reject the manuscript without entering the review process in the case that the topic, the contents, the format or ethical aspects are inappropriate. In order to ensure accuracy and transparency, every step of the peer review process is fully documented and recorded. If modifications to the manuscript are requested, the corresponding author should send to the Editorial Office the revised manuscript under two separate files, one file containing the revised clean version and another containing both a letter with point-by-point responses to the reviewers' comments and the revised version with corrections highlighted. Once accepted, all manuscripts are subjected to copyediting and formatting. The authors will be informed by e-mail when proofs are made available. Correction of proofs should be limited to typographical errors. Substantial changes in content (changes of title and authorship, new results and corrected values, changes in figures and tables) are subject to editorial review. Changes that do not conform

to the journal's style are not accepted. Corrected proofs must be sent back within 3 working days to the Editorial Office of the journal. In case of delay, the editorial staff of the journal may correct the proofs on the basis of the original manuscript and forward the article to publication. Publication of manuscripts is free of charge.

For further information about publication terms please contact the Editorial Office at trendsineo@aitonline.org.

Preparation of the Manuscript

The text file must be submitted using the template "[Authors Guideline](#)".
